

## Practice Drawing: Leaves

**What you need:** white paper and crayons

### Directions:

If you have any plants in your classroom, sit near one.

OR.... find a leaf at recess!

Observe the shape and lines of the leaf carefully.

With a crayon, draw the outside shape as large as you can.

Add the veins.

Draw it again, this time larger or smaller. Put it behind or in front of the first one.

Color in the leaf however you like, or use watercolors if they are available.

If you use paint, don't forget to clean up!
