

Maths Homework set 15.10.21, due 22.10.21

For your maths homework this week please complete pages 38-39 (Multiplying numbers up to 4 digits by a 2 digit number) in your Power Maths practice book.

Below is an example of the method we have been using in school.

Look at the columns.

Method 2

	1,235
20	1,235 × 20
1	1,235 × 1

I used long multiplication. It was quicker than the grid method.

$$\begin{array}{r} \\ \\ \times \\ \hline \\ 2 \\ \hline 2 \\ \hline \end{array}$$

1 × 1,235
20 × 1,235
21 × 1,235
