

Maths Homework 03.12.2021

This week we have been learning how to multiply fractions. Please complete pages 132-134 in your Power Maths book.

You may want to use the page below to help you.

a)

The total number of blocks gives the denominator of the answer.

The number of shaded blocks gives the numerator of the answer.

$$\frac{1}{2} \times \frac{1}{3} = \frac{1}{6}$$

$$\frac{3}{5} \times \frac{1}{4} = \frac{3}{20}$$

$$\frac{2}{5} \times \frac{1}{2} = \frac{2}{10}$$

I noticed that I multiply the numerators together and the denominators together.

b) $\frac{1}{2} \times \frac{1}{3} = \frac{1 \times 1}{2 \times 3} = \frac{1}{6}$

$$\frac{3}{5} \times \frac{1}{4} = \frac{3 \times 1}{5 \times 4} = \frac{3}{20}$$

$$\frac{2}{5} \times \frac{1}{2} = \frac{2 \times 1}{5 \times 2} = \frac{2}{10}$$

$$\text{So } \frac{2}{5} \times \frac{1}{2} = \frac{1}{5}.$$

I think I can simplify the last answer by dividing both the numerator and the denominator by 2.
