

‘How big is your footprint?’

Above you can see our enquiry question for next term. What do you think this means? What will we be learning about?

Discuss with your family about what you think our enquiry will be and illustrate this in the footprint on the following page (or you may want to draw around your own foot and fill that in). For example, if you think it's about our different shoe sizes you may draw lots of shoes in the footprint.

Once you have finished your footprint, you may want to do some research around the area you think we are learning about to give you a head start for next term.

Have a wonderful break 😊
