

Multiples and Factors

5

Henry is thinking of a number between 48 and 58.
It is a multiple of 4 and one of its factors is 7.

What number is Henry thinking of?

6

Look at these four number cards.

3

8

6

4

Which card is a common factor of 28 and 48?

Use two cards to make a two-digit number
that is a common multiple of 9 and 12.

7

Kali says:

"If a number has a factor of 8, it must also have factors of 2 and 4".

Is Kali correct? Circle YES or NO

Explain your answer.

"I know how to find multiples, factors,
common multiples and common factors."
